I am notifying you as to the beginning of mosquito control activities in Fremont. The Special Permit for Mosquito Control has arrived from the New Hampshire Division of Pesticide Control. The permit requires that appropriate town officials be notified as to the onset of activities. This letter serves as notification to the Town Administrator and Board of Selectmen.

Control of larval mosquitoes in stagnant bodies of water will begin on May 14, 2007. The primary method of control will be a bacterium (BTI) that is a naturally occurring parasite of mosquito larvae. Areas requiring control will be emergent marshes, cattail marshes, red maple swamps, woodland pools, roadside ditches, street and parking lot catch basins, marshes, flooded fields and stormwater basins.

Special emphasis will be placed upon the control of mosquito species that are known vectors of WNV and EEE. Please contact me with any questions at 603 2311271. Michael Morrison, Entomologist
